

HOMOLOGATION SERVICES

Lighting devices

COMPREHENSIVE TESTING SERVICES FOR
TYPE-APPROVAL OF LIGHTING- AND LIGHT
SIGNALING DEVICES

LIGHTING DEVICES

As a Technical Service for the type-approval of vehicles and vehicle components, we also test Road Illumination Devices (RID), Light Signalling Devices (LSD) and Retro-Reflective Devices (RRD) according to:

- UN ECE Regulations
- Technical requirements for vehicle parts during type testing in accordance with Section 22a StVZO

Currently we are offering the processing of approvals at German type-approval authority Kraftfahrt-Bundesamt (KBA).

Please contact us if you are interested in approval processing with other authorities.

ALEE – Alliance des laboratoires d'essais européenne GmbH is your reliable partner for all challenges related to homologation and conformity testing of vehicles and vehicle parts in the European Union. Our company was founded by a dedicated team with extensive experience and expertise in the industry. With passion and commitment, we support manufacturers in achieving compliance with the complex legal requirements of European market.

Our homologation services in the area of lighting devices encompass the following vehicle components:

- Road Illumination Devices (RID)
- Light Signalling Devices (LSD)
- Retro-Reflective Devices (RRD)
- Beacons and warning lamps
- Bicycle lamps
- Testing of the 'approximate effect' for lamps of imported vehicles

By collaborating with the testing laboratory Photometrik GmbH in Eppertshausen, we ensure the highest quality standards and transparency in testing your products.
